

SIDDHI KHOLKAR

Sales, Marketing & Recruiting Professional | Data Analytics

Sachse, TX • 484-479-4985 • siddhi197@gmail.com • [linkedin.com/in/siddhi197](https://www.linkedin.com/in/siddhi197) • github.com/siddhi197

PROFESSIONAL SUMMARY

Results-driven sales, marketing, recruiting, and customer engagement professional with experience generating qualified leads, delivering presentations, supporting talent acquisition, and building customer relationships through community events, retail marketing programs, career fairs, and RSVP-based sales events. Proven success engaging homeowners, identifying customer needs, and converting conversations into scheduled consultations while representing a nationally recognized brand.

Experienced in screening 100+ candidates monthly, evaluating qualifications, and supporting hiring initiatives. Combines strong communication and presentation skills with a technical background in software development, database management, and data analytics. Skilled in SQL, Excel, Tableau, Python, Power BI, and CRM platforms, with the ability to analyze customer behavior, identify conversion opportunities, and develop data-driven solutions that improve business performance.

U.S. Permanent Resident (Green Card Holder) available for full-time opportunities.

CORE COMPETENCIES

Lead Generation & Pipeline Development • Event Marketing & Brand Promotion • Customer Engagement & Relationship Building • Recruiting & Candidate Screening • Talent Acquisition Support • Sales Presentations & Consultative Selling • Marketing Operations • CRM & Customer Data Management • Sales Performance Reporting • KPI Dashboard Development • Market Research & Customer Insights • Cross-Functional Collaboration • Microsoft Excel & PowerPoint • SQL • Python • Tableau • Power BI • Salesforce • Google Analytics

PROFESSIONAL EXPERIENCE

Renewal by Andersen 2025 – Present

Senior Event Marketing & Sales Representative

- Represent the company at community events, home shows, expos, festivals, and retail partner locations, engaging homeowners and generating qualified leads for in-home window and door consultations.
- Build rapport with 50–100+ prospective customers weekly, identify homeowner needs, educate customers on available solutions, and consistently schedule 20–30+ qualified consultations that contribute to sales pipeline growth.
- Host RSVP-based marketing events at upscale venues, delivering presentations to groups of homeowners, answering questions, addressing concerns, and converting attendees into scheduled consultations.
- Utilize Enabled Plus to coordinate RSVP events, manage attendee information, track event activities, and support lead generation efforts.
- Analyze customer interactions and event engagement trends to identify opportunities for improved outreach effectiveness and lead conversion.
- Support recruiting and talent acquisition initiatives by hosting career fairs and recruiting events, screening 100+ candidates monthly, evaluating qualifications, and advancing qualified candidates through the hiring process.
- Collaborate with sales, marketing, and recruiting teams to support business growth, customer acquisition, and talent pipeline development.
- Create and publish promotional flyers and event marketing content across online platforms and social media channels to increase event visibility, drive attendance, and support lead generation initiatives.

Data Analytics Projects & Independent Training 2023 – Present

SQL • Python • Tableau • Excel

GitHub: <https://github.com/siddhi197/>

- Built SQL, Excel, Python, and Tableau projects focused on marketing, recruiting, and customer conversion analytics
- Designed dashboards that reduced manual reporting effort by **30–40%**, improving KPI visibility and decision-making
- Conducted funnel analysis on **5,000+ records**, identifying that follow-up within 48 hours improved conversion by **20–25%**
- Developed segmentation and behavioral analysis models to understand customer engagement and hiring pipeline trends
- Translated raw datasets into actionable business insights for marketing, sales, and talent acquisition workflows

eAura Technologies 2016 – 2020

PHP Developer & Database Analyst

- Developed and maintained 10+ client web platforms, managing MySQL databases with thousands of records and ensuring data integrity across e-commerce and business systems.
- Reduced application issues by ~20% through systematic debugging, performance optimization, and data validation — directly improving user experience and platform reliability.
- Translated client business requirements into technical specifications, bridging the gap between operations and technology — a key skill for e-commerce platform management.
- Managed database updates, reporting needs, and system enhancements to improve user experience and platform performance.

Sapna Technologies (India) 2006 – 2008

Database Analyst & Web Developer

- Supported data migration and database management for international clients, ensuring accuracy and system functionality across e-commerce and web platforms.
- Assessed user requirements and data entry points, translating them into scalable technical solutions — building a foundation in platform operations and digital business systems.

ANALYTICS PROJECTS

Marketing Campaign Performance & Customer Conversion Analysis | Excel

Analyzed 2,200+ customer records (Kaggle Customer Personality dataset) to evaluate campaign effectiveness, sales channel performance, and customer spending behavior across 5 marketing campaigns.

- Identified Campaign 4 as the highest-converting campaign; compared store, web, catalog, and deal-based channels to determine that store purchases dominated revenue — directly relevant to omnichannel e-commerce strategy.
- Segmented customers by income, age, and behavior; found high-income and senior segments generated the highest revenue, and that a small customer group drove the majority of total spend — enabling targeted promotional strategy.
- Performed a full data cleaning pipeline including median imputation, feature engineering (Customer Value Score, tenure, age, total spend), and built an interactive dashboard with KPI visualizations.

Cyclistic Bike Share Analysis | SQL, Tableau

Analyzed 12 months (~5M+ records) of transactional data to identify behavioral differences between customer segments — methodology directly transferable to e-commerce buyer segmentation.

- Identified that casual users showed ~30–40% higher weekend engagement, informing targeted marketing strategies; built Tableau dashboards reducing analysis time by ~40%.

Retail Sales Performance Dashboard | *Excel*

Built dashboards analyzing 10K+ transaction records to uncover revenue trends, seasonal demand patterns, and pricing insights.

- Identified top 20% of customers contributing ~60% of total revenue, enabling focused retention and upsell strategies. Reduced manual reporting by ~30% through automated dashboards.

Nashville Housing Data Cleaning | *SQL*

Cleaned and standardized 50K+ records, reducing data inconsistencies by ~25% through deduplication and transformation — ensuring reliable datasets for downstream analysis.

TECHNICAL SKILLS & TOOLS

- Data & Analytics: Advanced SQL (Joins, CTEs, Subqueries), Python (Pandas, NumPy), Excel (Pivot Tables, Dashboards, Advanced Formulas), Tableau, Power BI, BigQuery
- CRM, Sales & Business Tools: Salesforce CRM, Enabled Plus, Microsoft Office Suite (Excel, PowerPoint, Word), Google Analytics, Jupyter Notebook, Git/GitHub
- Marketing & Content Creation: Canva, Social Media Content Creation, Event Promotion, Flyer Design, Online Advertising, SEO Fundamentals, Email Marketing
- Business & Operations: Lead Generation, Customer Engagement, Candidate Screening, Recruiting Support, Event Marketing, Sales Presentations, Sales Reporting, Market Research, KPI Tracking, Cross-Functional Collaboration

EDUCATION & CERTIFICATIONS

Bachelor of Engineering in Information Technology — Goa University, India

CERTIFICATIONS::

- IBM Data Analytics Professional Certificate
- Google Data Analytics Professional Certificate
- CRM Salesforce Training

PROFESSIONAL DEVELOPMENT

- Hands-on Analytics Training (2023–2026): SQL, Excel, Tableau, Python — applied to real-world business datasets
